

AI VISION FOR THE REAL WORLD

Enabling AI to See, Understand and Interact with the World

THE WORLD HAS MORE EYES THAN EVER. BUT SEEING IS NOT UNDERSTANDING.

Cameras, robots, drones and intelligent devices are continuously capturing massive amounts of visual data. Data is everywhere. Understanding is limited.

The real challenge is:
How can machines truly understand the real world?

OUR VISION

Turning Visual Data into Real-World Intelligence

Vietadata connects AI with the physical world through advanced AI Vision technology. We enable machines to move beyond seeing—to understanding, analyzing, and taking intelligent actions.

SEE

Recognize people, objects, environments and events.

UNDERSTAND

Analyze behaviors, situations and potential risks.

INTERACT

Support smarter decisions and real-world operations.

OUR AI VISION CAPABILITY

From Perception to Real-World Applications

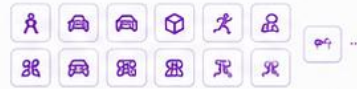

AI VISION PLATFORM

A complete visual intelligence platform connecting AI algorithms, data understanding, and intelligent applications.

ADVANCED AI ALGORITHMS

T20+ AI vision algorithms designed for complex real-world scenarios.

INTELLIGENT DEVICES INTEGRATION

Supporting cameras, robots, drones, and other intelligent systems.

END-TO-END DEPLOYMENT

From AI models and software platforms to real-world implementation.

REAL-WORLD APPLICATIONS

Making the Physical World Smarter

SAFETY INTELLIGENCE

Detect risks, improve security, and enable proactive protection.

INDUSTRIAL INTELLIGENCE

Support automation, inspection, and intelligent manufacturing.

OPERATIONAL INTELLIGENCE

Improve efficiency through real-time understanding and analysis.

SMART INFRASTRUCTURE

Enable intelligent management of campuses, logistics, ports, and urban environments.

PROVEN IN REAL-WORLD ENVIRONMENTS

Vietadata solutions have been deployed in complex scenarios including:

Global footprints include:

China • United States • Mexico • Hong Kong • Djibouti

and expanding through international partnerships.

WHY VIETADATA

AI VISION EXPERTISE

Focused on visual intelligence and real-world AI applications.

REAL-WORLD EXPERIENCE

Technology proven in complex physical environments.

FULL-STACK CAPABILITY

From algorithms and platforms to deployment and integration.

GLOBAL COLLABORATION

Partnering worldwide to build the future of AI Vision.

**BUILD THE FUTURE
OF AI VISION TOGETHER**

We are looking for:

GLOBAL
TECHNOLOGY
PARTNERS

INDUSTRY
COLLABORATORS
